Anisha Amar Srivastava

AI/ML Engineering Student | Cloud, Data & Enterprise AI
+91 7774910689 | anishasrivastava2005@gmail.com | LinkedIn | GitHub

Objective

Final-year B.Tech (AI & ML) student who builds and deploys cloud-hosted applications with data analytics and AI features. Looking for an entry-level role in Analytics and Digital Solutions to apply AI and BI to real business problems.

Education

VIT Bhopal University 2023 – 2027
B.Tech in Artificial Intelligence & Machine Learning, CGPA: 8.26

Class XII, Maharashtra State Board 2022
Class X, Maharashtra State Board *2020*

Technical Skills

AI & ML: Applied machine learning in Python, Claude Vision API integration, AI-assisted productivity tools
Cloud & Deployment: Firebase (Hosting, Firestore), Vercel serverless functions, GitHub, cloud computing fundamentals (NPTEL)
Data & Analytics: Sales analytics dashboards (Chart.js), SQL/MySQL (PHP prototype), MS Excel, Google Sheets
Programming & Web: C++ (DSA practice), Python, JavaScript, React, Vite, HTML/CSS, Bootstrap, PHP

Projects

Vnet Vyapar | *Firebase, JavaScript, Chart.js* vnet-vyapar.web.app

- Built and deployed a live, cloud-hosted business app (Firebase Hosting and Firestore) for small shopkeepers: invoicing, udhaar (credit) tracking, sales analytics dashboards, and WhatsApp bill sharing. Now used by a client shop of M-softs Development.
- Designed login with SHA-256 password hashing and session tokens; fixed a slow invoice flow by showing the invoice immediately and saving to Firestore in the background.
- Prototyped a separate SQL/PHP backend to evaluate the client's alternate database requirement against the Firebase (NoSQL) approach.

NestIQ | *React, Vite, Claude Vision API, Vercel* *Deployment in progress*

- Building an AI room decor recommender that analyses a room photo and suggests items based on style, budget, and two user modes ("Moving In" vs. "Already Settled").
- Kept the AI API key secure on the server side using Vercel serverless functions.

Experience

Software Development Intern May 2026 – June 2026
M-softs Development

- Built frontend functionality for an inventory management system, including CRUD operations and dynamic UI rendering.
- Worked with the team to define product filtering and sales tracking features based on end-user workflow needs.

Certifications

Applied Machine Learning in Python – University of Michigan
NPTEL Cloud Computing (Elite) | NPTEL Introduction to Internet of Things (Silver + Elite)
Google IT Professional Certificate | ServiceNow Virtual Internship Program – SmartBridge x AICTE
AI Tools Workshop (ChatGPT & AI Productivity) – be10x

Leadership & Volunteering

- **Finance Team, Marathi Cultural Club** (Sept 2024): Managed budgeting and financial coordination with transparent fund allocation and tracking.
- **Promotion & Outreach, AIEM Club** (Feb 2025): Contributed to a promotional reel for RoboRush 2025 that helped drive event visibility and participation.
